

Company Profile (Government Tender Summary)

DALA TECHNOLOGIES delivers professional ICT infrastructure solutions for businesses and public sector clients across South Africa. We specialise in Fiber & Data Network Infrastructure, Structured Cabling, CCTV & ANPR Security Systems, and Video Conferencing (VC) Systems. We provide end-to-end delivery: site survey, design & planning, supply & installation, testing & commissioning, documentation & handover, and maintenance support.

Core Services

- Fiber installation, splicing & OTDR testing
- Structured cabling (Cat6/Cat6A), patch panels & labeling
- Server room builds: racks, containment & cable management
- CCTV design & installation, ANPR integrations, remote access
- Video conferencing room setups & AV integration
- Testing, commissioning, handover packs & maintenance options

Tender Readiness

- Method statements & project plans
- Risk assessments (HSE) and housekeeping
- As-built documentation & labeling schedules
- Cable test results, commissioning & handover sign-off
- Maintenance plans and SLA options
